PROFILE

Results-driven Full-Stack Developer with nearly 3 years of experience designing and implementing high-performance web applications. Expert in front-end development using Angular and JavaScript, with robust back-end skills in .NET Core. Adept at optimizing CI/CD pipelines with Azure DevOps, ensuring rapid, reliable deployments. AWS Certified Cloud Practitioner with practical experience in cloud solutions. Committed to delivering clean, maintainable code and collaborating in Agile environments to achieve business goals.

SKILLS

- **Front-End:** Angular, Vue.js, TypeScript, JavaScript, HTML5, CSS3
- **Back-End:** ASP.NET Core, .NET Core, C#
- **Cloud & Database:** Azure DevOps, AWS, CI/CD, SQL Server
- **Testing & QA:** Cypress, Jest, QA
- **Version Control:** Git, GitHub

WORK EXPERIENCE

Full Stack Developer | Loja Interativa

August 2022 – Present

- **Full Stack Development:** Proven track record in creating scalable and robust web applications, showcasing proficiency in Angular for front-end development and .NET Core for building secure and efficient back-end systems.
- **Process Optimization:** Optimized deployment processes with Azure DevOps, achieving a 30% reduction in deployment time and enhancing overall software delivery quality.
- **System Integration & Automation:** Designed and implemented seamless integration of services and APIs, enhancing data flow and system functionality. Automated data synchronization reduced manual errors by 60% and boosted system performance by 25%.

PROJECTS

Financial Progress Metrics

Technologies Used: Angular, .NET Core, SQL Server, Azure DevOps

- Developed a comprehensive system that automates contract management for construction projects, streamlining the measurement and validation of project progress.
- Facilitated accurate tracking of project milestones, enabling timely and transparent payments to suppliers based on validated progress.

Energy Field Safety Checklist

Technologies Used: Angular, .NET Core, SQL Server, Azure DevOps

- Developed a field-oriented safety checklist system for technicians working in electrical substations, ensuring the accurate reporting of incidents, accidents, and other critical occurrences.
- Enabled real-time data capture and submission directly from the field, improving the response time and accuracy of incident reporting.

EDUCATION

Uninter International University Center

April 2022 – October 2024

Associate degree in Analysis and Systems Development

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C01)
- English Certificate C1 level, EF SET

LANGUAGES

- **English:** C1 Level (Advanced)
- **Portuguese:** Native
